

Audatex® Shop Reports™

“With Audatex Shop Reports, our shops can proactively monitor key metrics that our insurance partners track. We use the same data our insurance partners have used to manage us. Not only that, but Audatex Shop Reports is the only way we can get industry comparison. We are very happy with the Audatex reporting solution and have adopted it in more than 100 shops in our organization.”

Larry Jeffreies, Executive Vice President, CARSTAR Automotive Canada

Concise, Automated Reports

Audatex Shop Reports is a secure, web-based application that provides 15 key performance indicators (KPIs) tracked by insurers. Using this tool, collision repair professionals can see how their KPIs compare to industry averages in their market, within a three zip code geographic area. Report data is based on estimates uploaded to the Audatex host server as part of a collision repair facility's participation in a DRP or similar insurance partnership program.

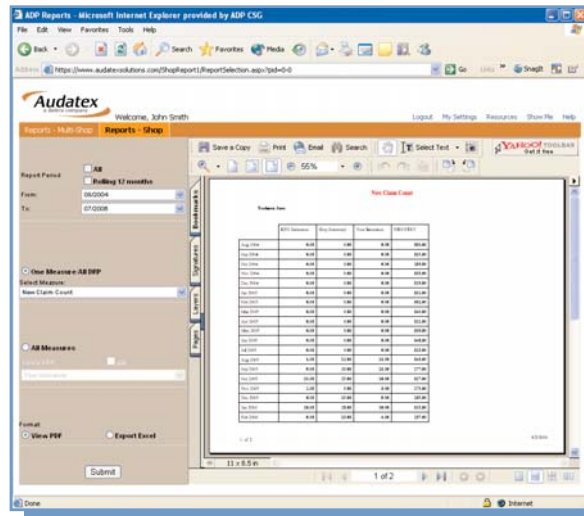

Track, Manage and Grow Your Insurance Business

With Audatex Shop Reports, collision repairers can grow their insurance business by identifying areas of their organization that need improvement and then focusing on those areas to win more repair program accounts. Audatex Shop Reports let repair facilities self-manage their insurance relationships by providing access to the same data insurance carriers use for shop evaluation. Having comprehensive, organized data at their fingertips means that these repairers can make more strategic business decisions—decisions that will ensure the successful future of their organizations.

Audatex Shop Reports

Features and Benefits

- Web-based reporting on 15 KPIs:
